

EX NO: 6 C	Interaction with the File System in Node.js
DATE: 23.07.26	

AIM:

To develop and execute a simple Node.js application that accepts user input and performs a basic operation.

Steps To Process:

Step 1: Create a Project Folder

- Create a new folder named SimpleNodeApp.
- Open the folder in Visual Studio Code.

Step 2: Create a JavaScript File

- Create a file named app.js.

Step 3: Write the Program

- Import the built-in readline module.
- Create an interface to accept user input.
- Prompt the user to enter their name.
- Display a welcome message using the entered input.

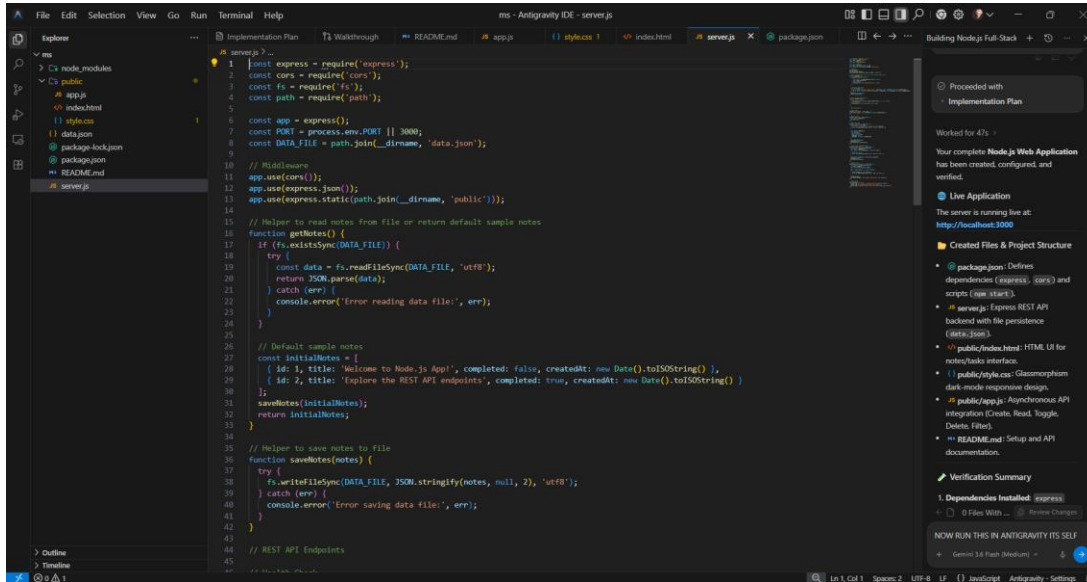

Step 4: Execute the Program

- Open the terminal.
- Navigate to the project folder.
- Run the application using Node.js.

Step 5: Verify the Output

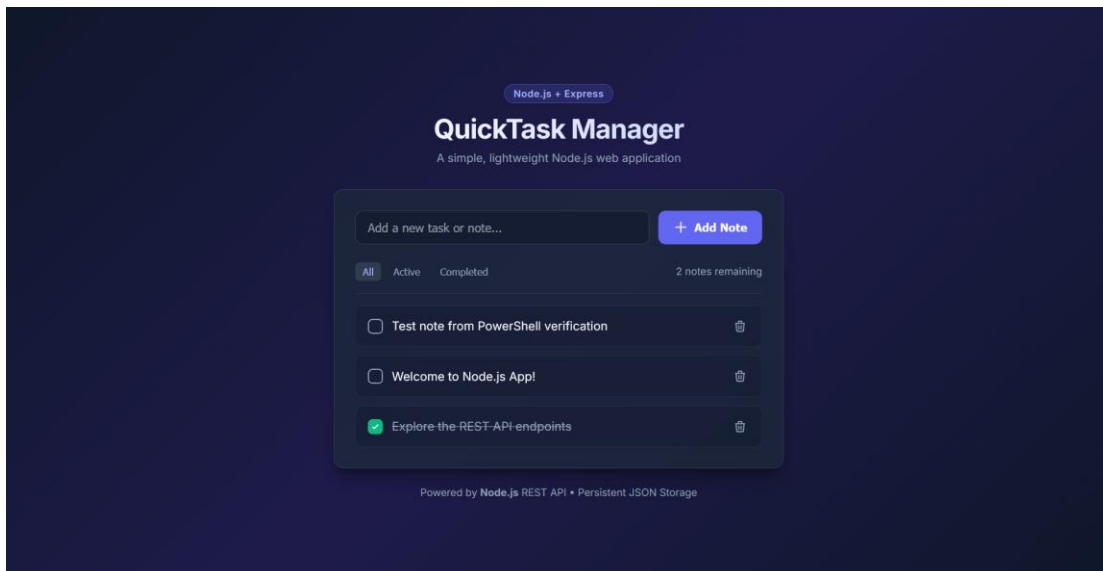

- Enter a name when prompted.
- Observe the personalized greeting displayed in the terminal.

CODE:

```
1 const express = require('express');
2 const cors = require('cors');
3 const fs = require('fs');
4 const path = require('path');
5
6 const app = express();
7 const PORT = process.env.PORT || 3000;
8 const DATA_FILE = path.join(__dirname, 'data.json');
9
10 // Middleware
11 app.use(cors());
12 app.use(express.json());
13 app.use(express.static(path.join(__dirname, 'public')));
14
15 // Helper to read notes from file or return default sample notes
16 function getNotes() {
17   if (fs.existsSync(DATA_FILE)) {
18     try {
19       const data = fs.readFileSync(DATA_FILE, 'utf8');
20       return JSON.parse(data);
21     } catch (err) {
22       console.error('Error reading data file:', err);
23     }
24   }
25
26   // Default sample notes
27   const initialNotes = [
28     { id: 1, title: 'Welcome to Node.js App!', completed: false, createdAt: new Date().toISOString() },
29     { id: 2, title: 'Explore the REST API endpoints', completed: true, createdAt: new Date().toISOString() }
30   ];
31   saveNotes(initialNotes);
32   return initialNotes;
33 }
34
35 // Helper to save notes to file
36 function saveNotes(notes) {
37   try {
38     fs.writeFileSync(DATA_FILE, JSON.stringify(notes, null, 2), 'utf8');
39   } catch (err) {
40     console.error('Error saving data file:', err);
41   }
42 }
43
44 // REST API Endpoints
45
46
```

Output:

RESULT:

A basic Node.js application was created using the built-in **readline** module. The program successfully
